- Origin and Evolution
- Physic Caract.
- Ecology of Trout
- Management

# Origin and Evolution

Glacial Origin  
15 000 years ago .....

1- Melo Lake

2- Oriente Lake

# Origin and Evolution

..... Sediment Accumulation / Deposition  
..... Filling

3- Marmano *Pozzines*

4- Cuscione *Pozzines*

Nino *Pozzines*  
Stream order 1 Strahler  
Tavignano

**Nino Lake**  
Surface area : 6,5 ha  
Depth max : 11 m  
Altitude : 1743 m

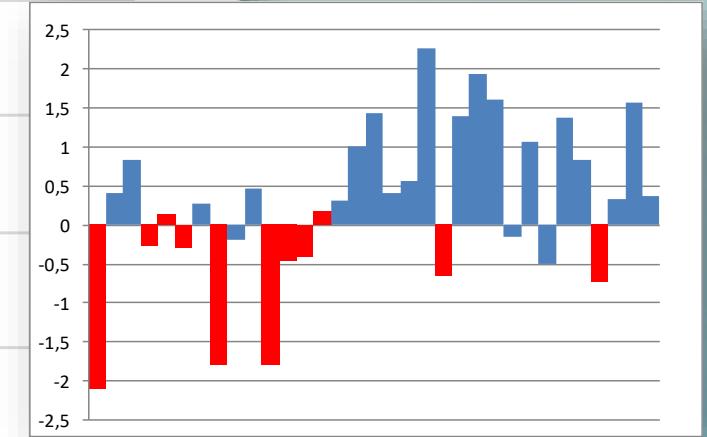

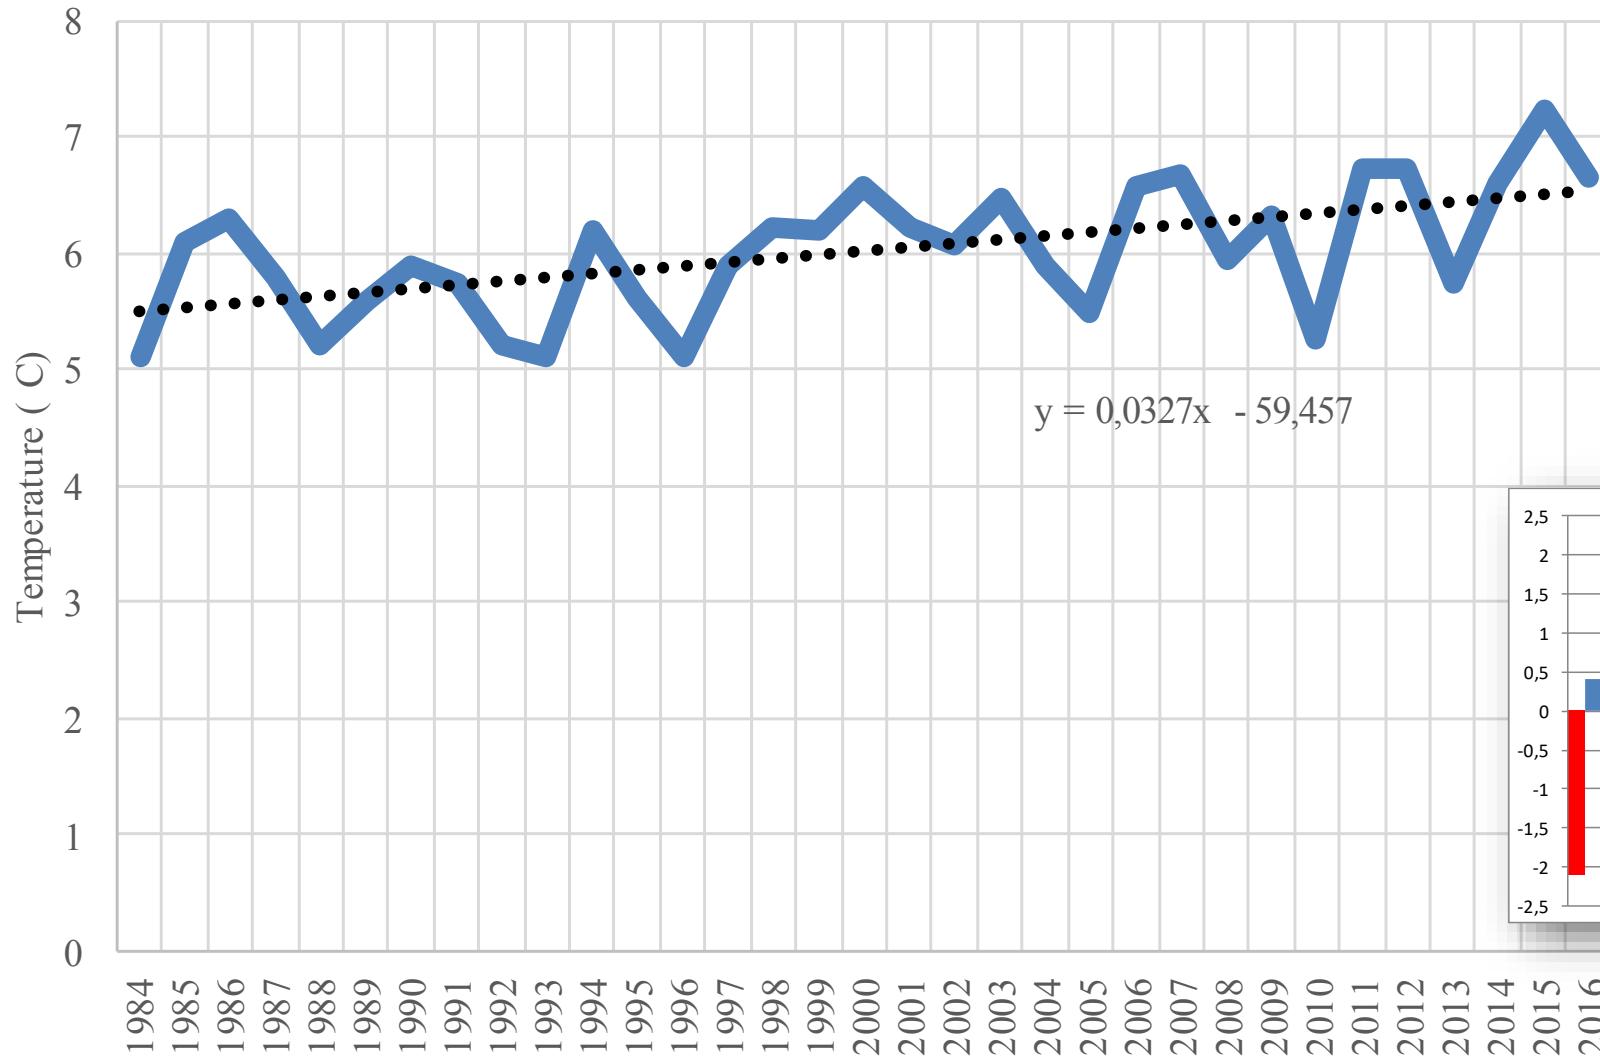

# Nino Valley

Site sampling

Tavignano River

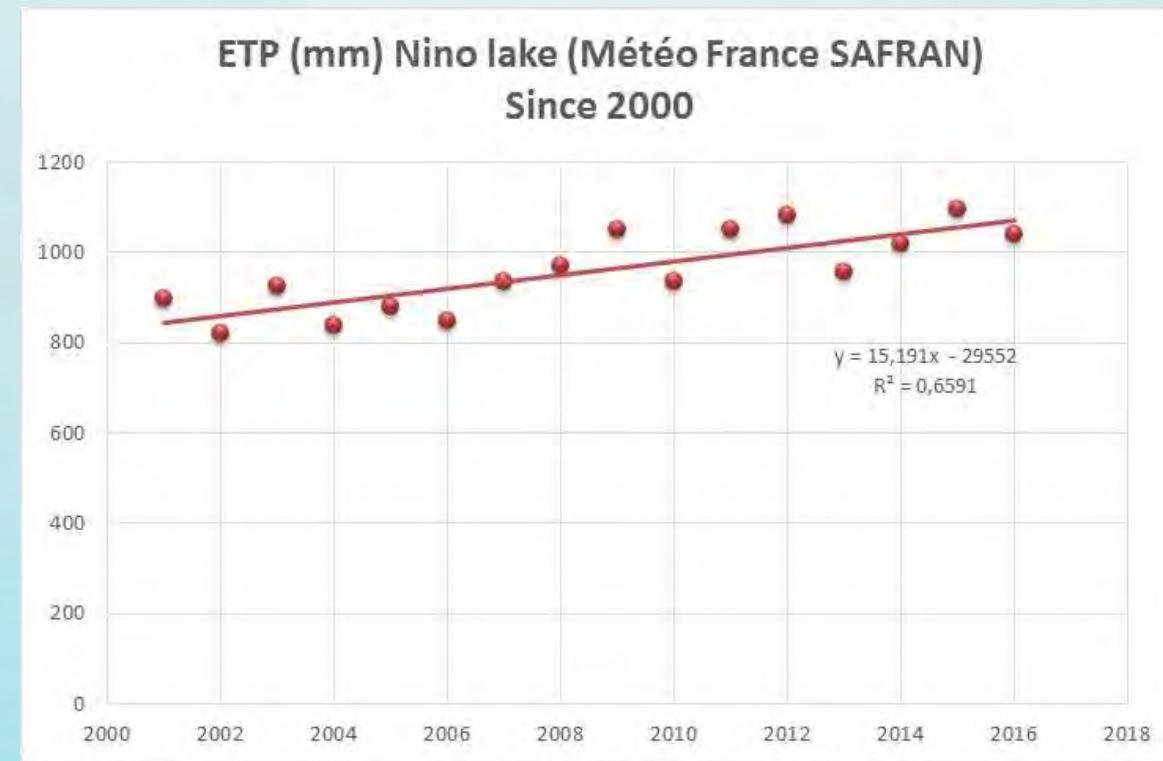

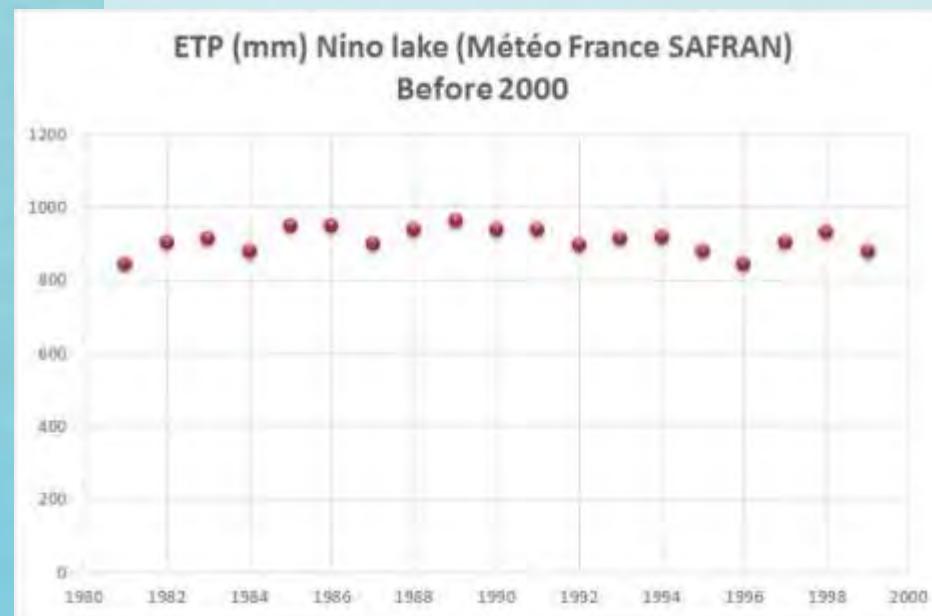

## Air Temperature

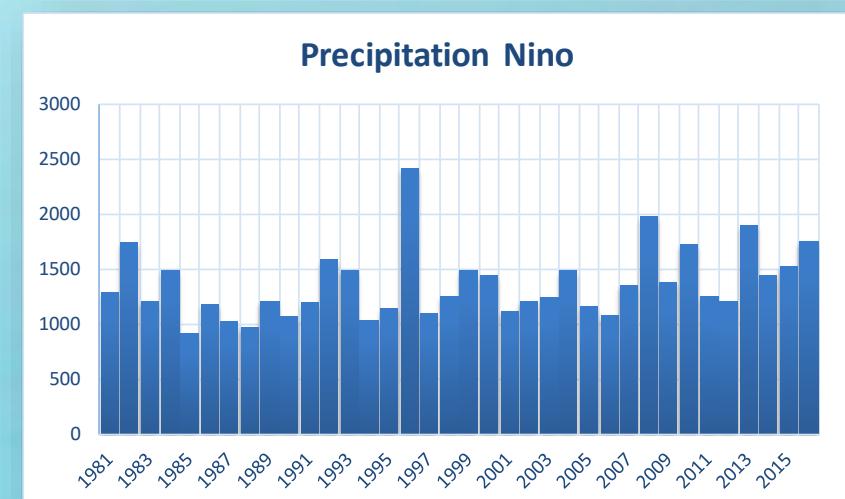

Estimated Temperature (°C) at Nino Valley with « SAFRAN »  
Software of MétéoFrance (mesh 8X8 km)

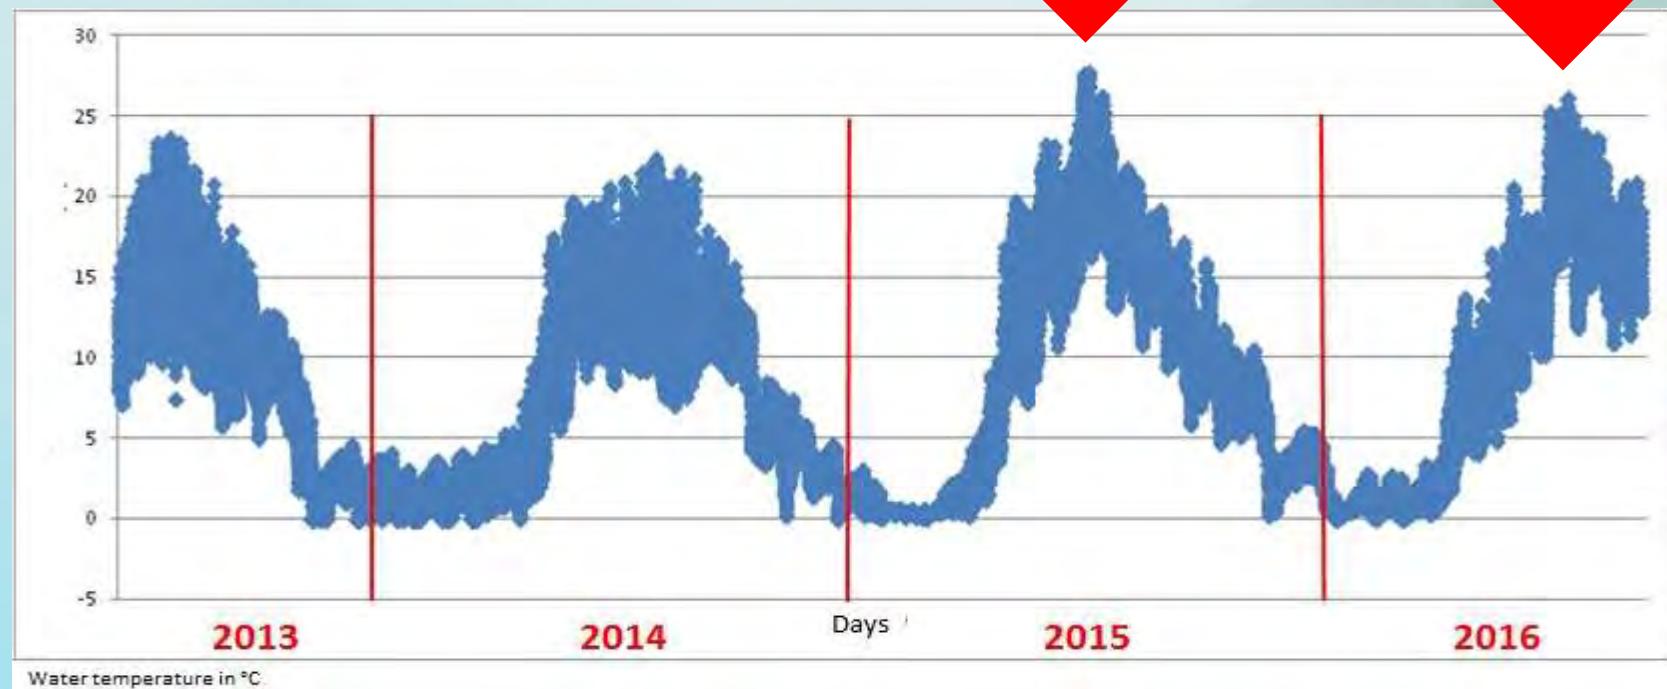

# Evapotranspiration and Precipitation Nino Valley

Estimated ETP (mm) and  
Precipitation (mm) at Nino Valley  
with « SAFRAN » Sofware of  
MétéoFrance (mesh 8X8 km)

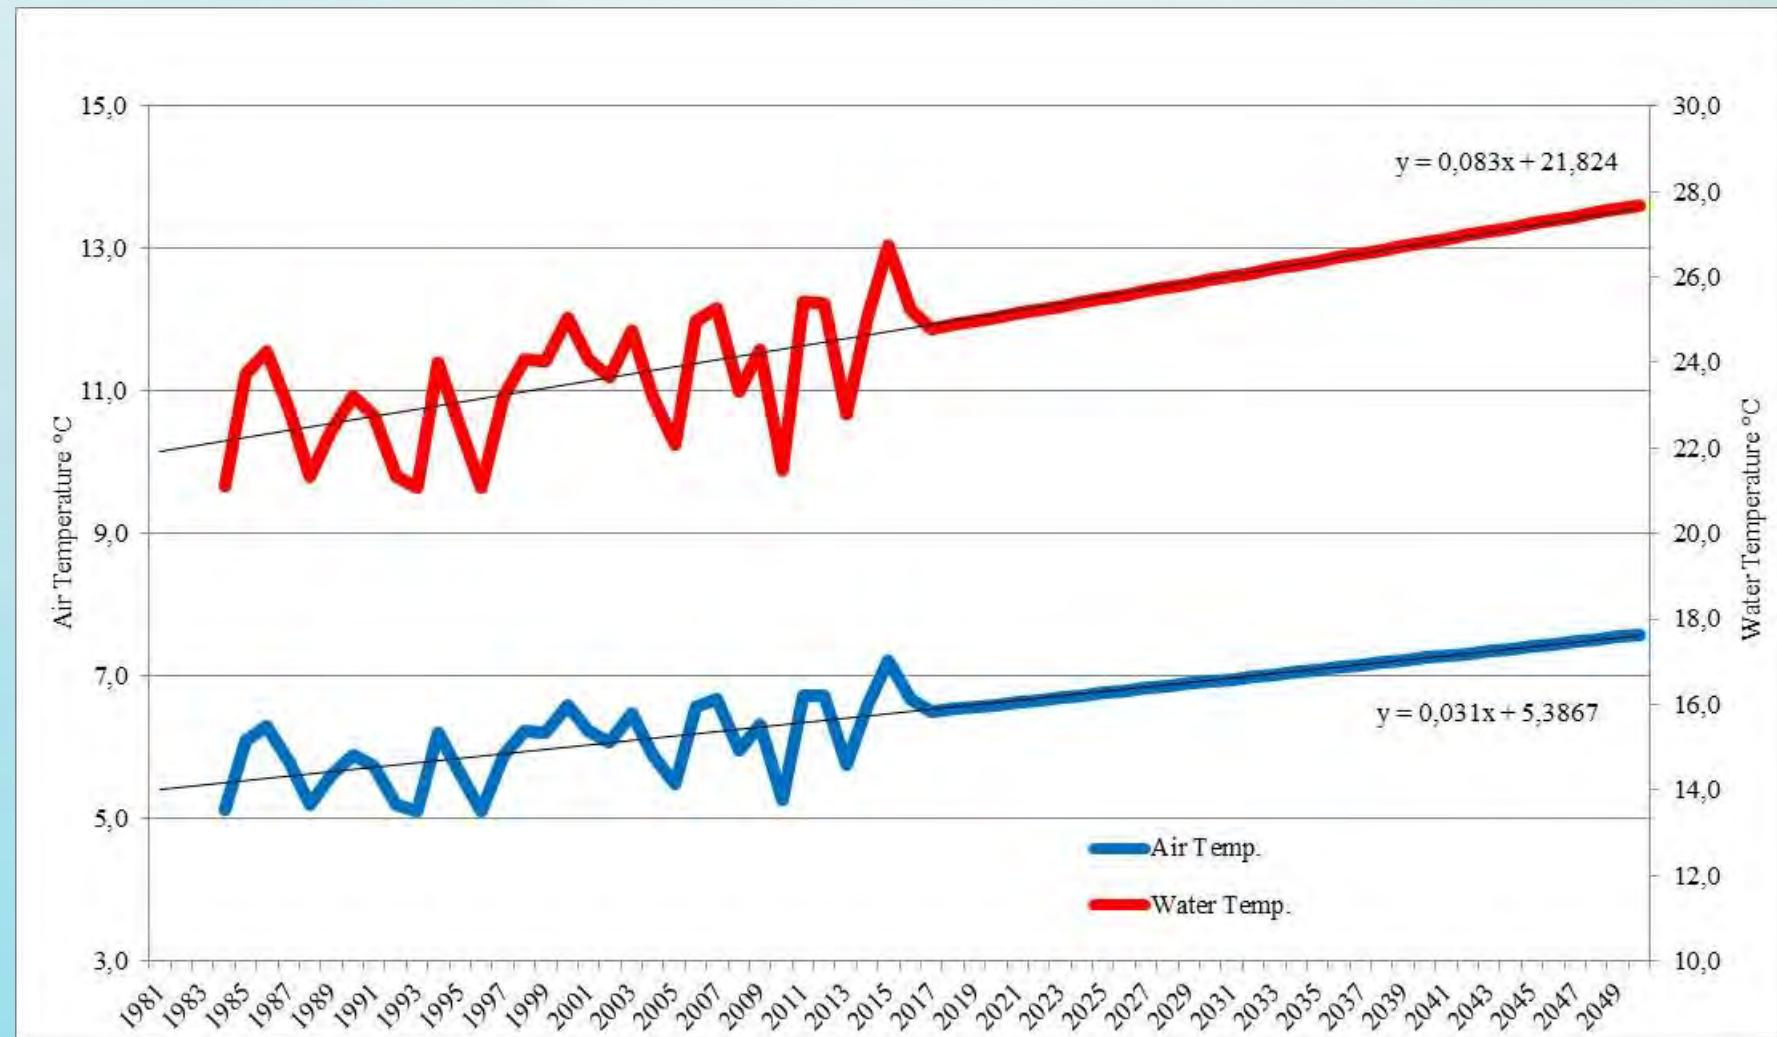

- Water Temperature of *Pozzines*
- 2015 – 27,8 °C max
- 2016 – 26,3 °C max

Recording of water temperature of Nino pozzines (2013-2016)

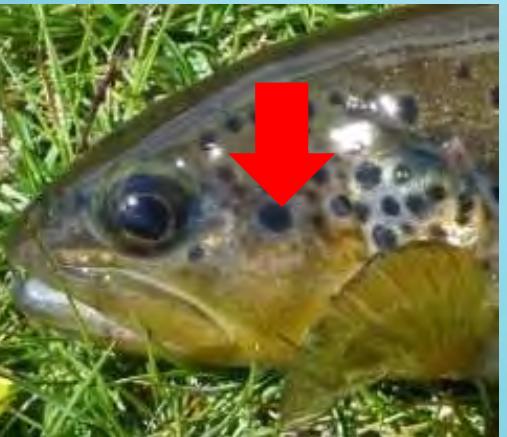

- Water Temperature
- Air Temperature
- Right side of equations
- $a_{temp} = 0,082$
- $a_{air} = 0,031$
- 2050 : 28°C in water

Extrapolation of water temperature and air temperature in the pozzines of Nino

Stéphane Muracciole

4+ group

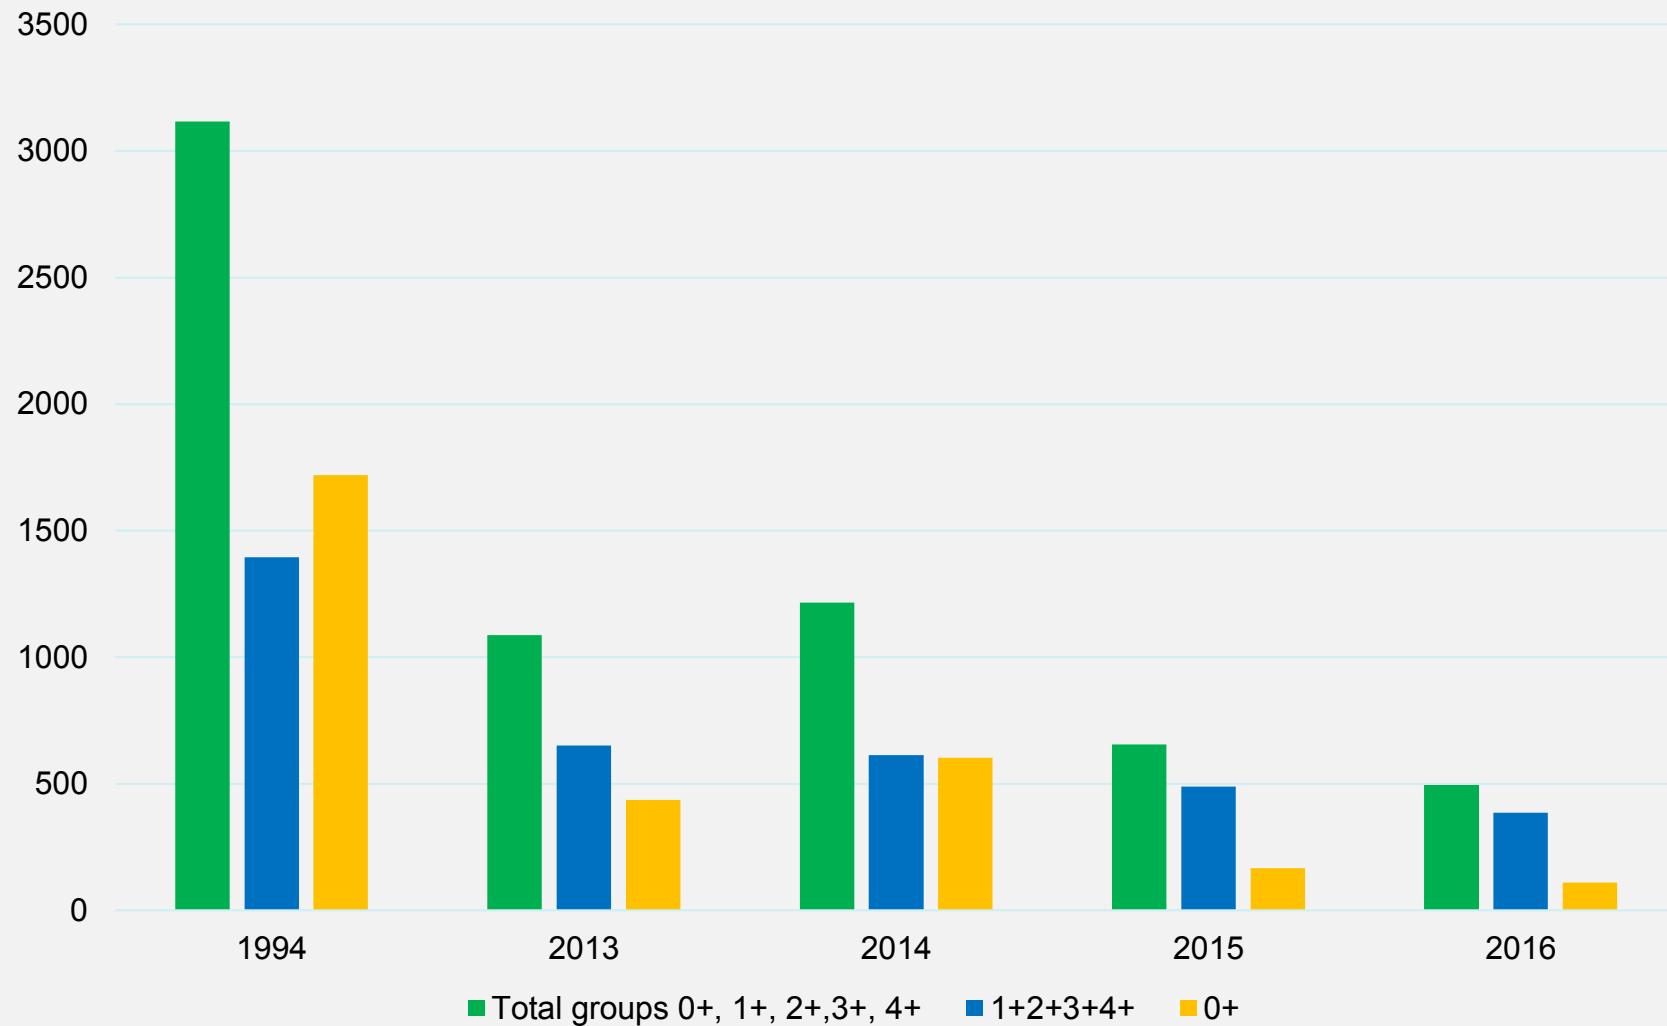

*Salmo trutta macrostigma*,  
Dumeril, 1855

0+ group

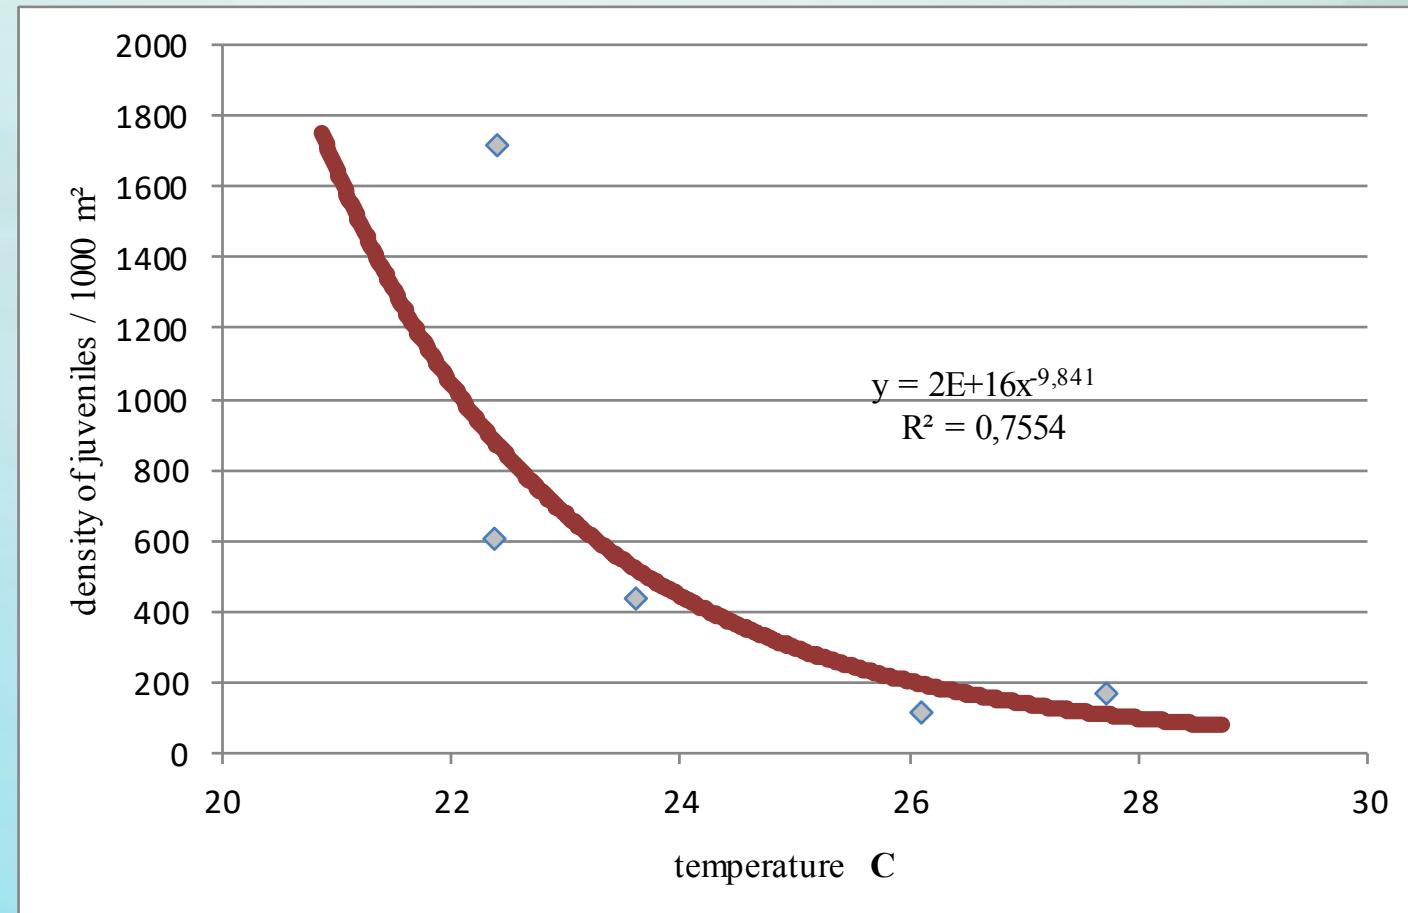

Stéphane Muracciole

## TROUT in Nino - Number of captures / 1000 m<sup>2</sup>

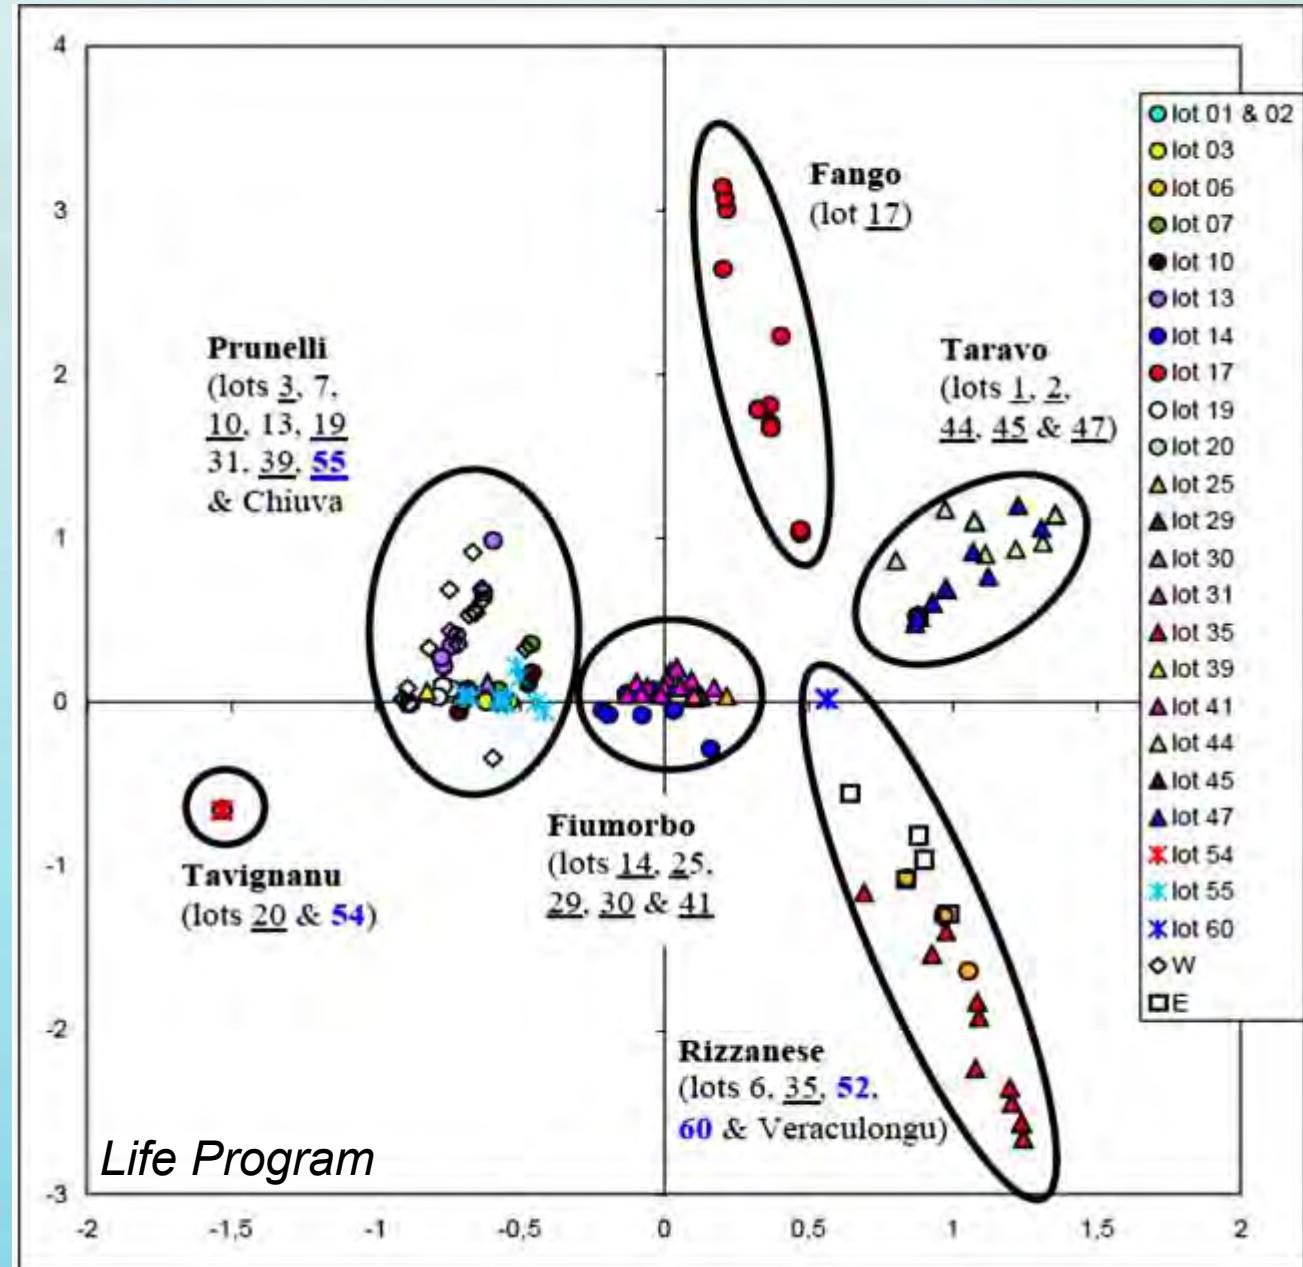

Density of trout population of Nino *Pozzines*

- Water Temperature and Juvenile populations O+
- Extrapolation : 28°C (2050) < 100 juv O+/1000 m<sup>2</sup>

Relation between water temperature and juvenile populations O+

- Endemic Trout of Corsica
- Macrostigma
- Geographic isolation / valley / watershed
- Compartmented area in Watershed
- Watershed barrier to genetic exchange
- 6 trout varieties

## PROTECTION STATUS

- European level: appendix II of the directive “Habitats Faune Flore”
- National level: Decree of December 8th, 1988 fixing the list of the fish species protected on the unit from the national territory
- National Red List, in danger criticizes extinction

## CONSERVATION STATUS

- CR
- Critically Endangered

## LIFE PROGRAM

- Improve knowledge of the characteristics and the distribution of the macrostigma trout
  - Test reproduction in semi-natural environment
  - Protect populations and habitats
  - Inform and sensitize

Thomas Pesquet

# H. Le Treut

## Role of Scientific Community

## Concerning Corsica

- « **To provide to the different governments** with the necessary incentive and diagnostics, so that they may increase their engagement to diminish emissions, as the NDCs are insufficient by a factor 2 at least. »
- « **To define the scientific basis** of an adaptation policy, anticipating what can happen at the **scale** of a city or a region »

- Transfer in competences in Corsica. The law of January 22nd, 2002 entrusts to the Assembly of Corsica a broad lawfull power relating to the environment, the language, the formation, teaching, research, the culture and the heritage

- Local action
- Specific laws
- Creation of nature reserves

A wide-angle photograph of a mountainous landscape. In the foreground, there are several small, shallow, dark-colored depressions or ponds scattered across a green, grassy field. The middle ground shows more of these fields and some rocky outcrops. The background consists of steep, rocky mountainsides covered with sparse vegetation.

Thank you for your attention
